softened by something new.*

## repair-rewear-relove

*klinik* was born from a simple belief:  
existing things have value.

Our upcycled leather patches transform everyday  
wear and tear into unique graphic details – turning  
imperfections into design features.

Don't replace. Repair with style, and let the objects you  
love keep growing old with you.

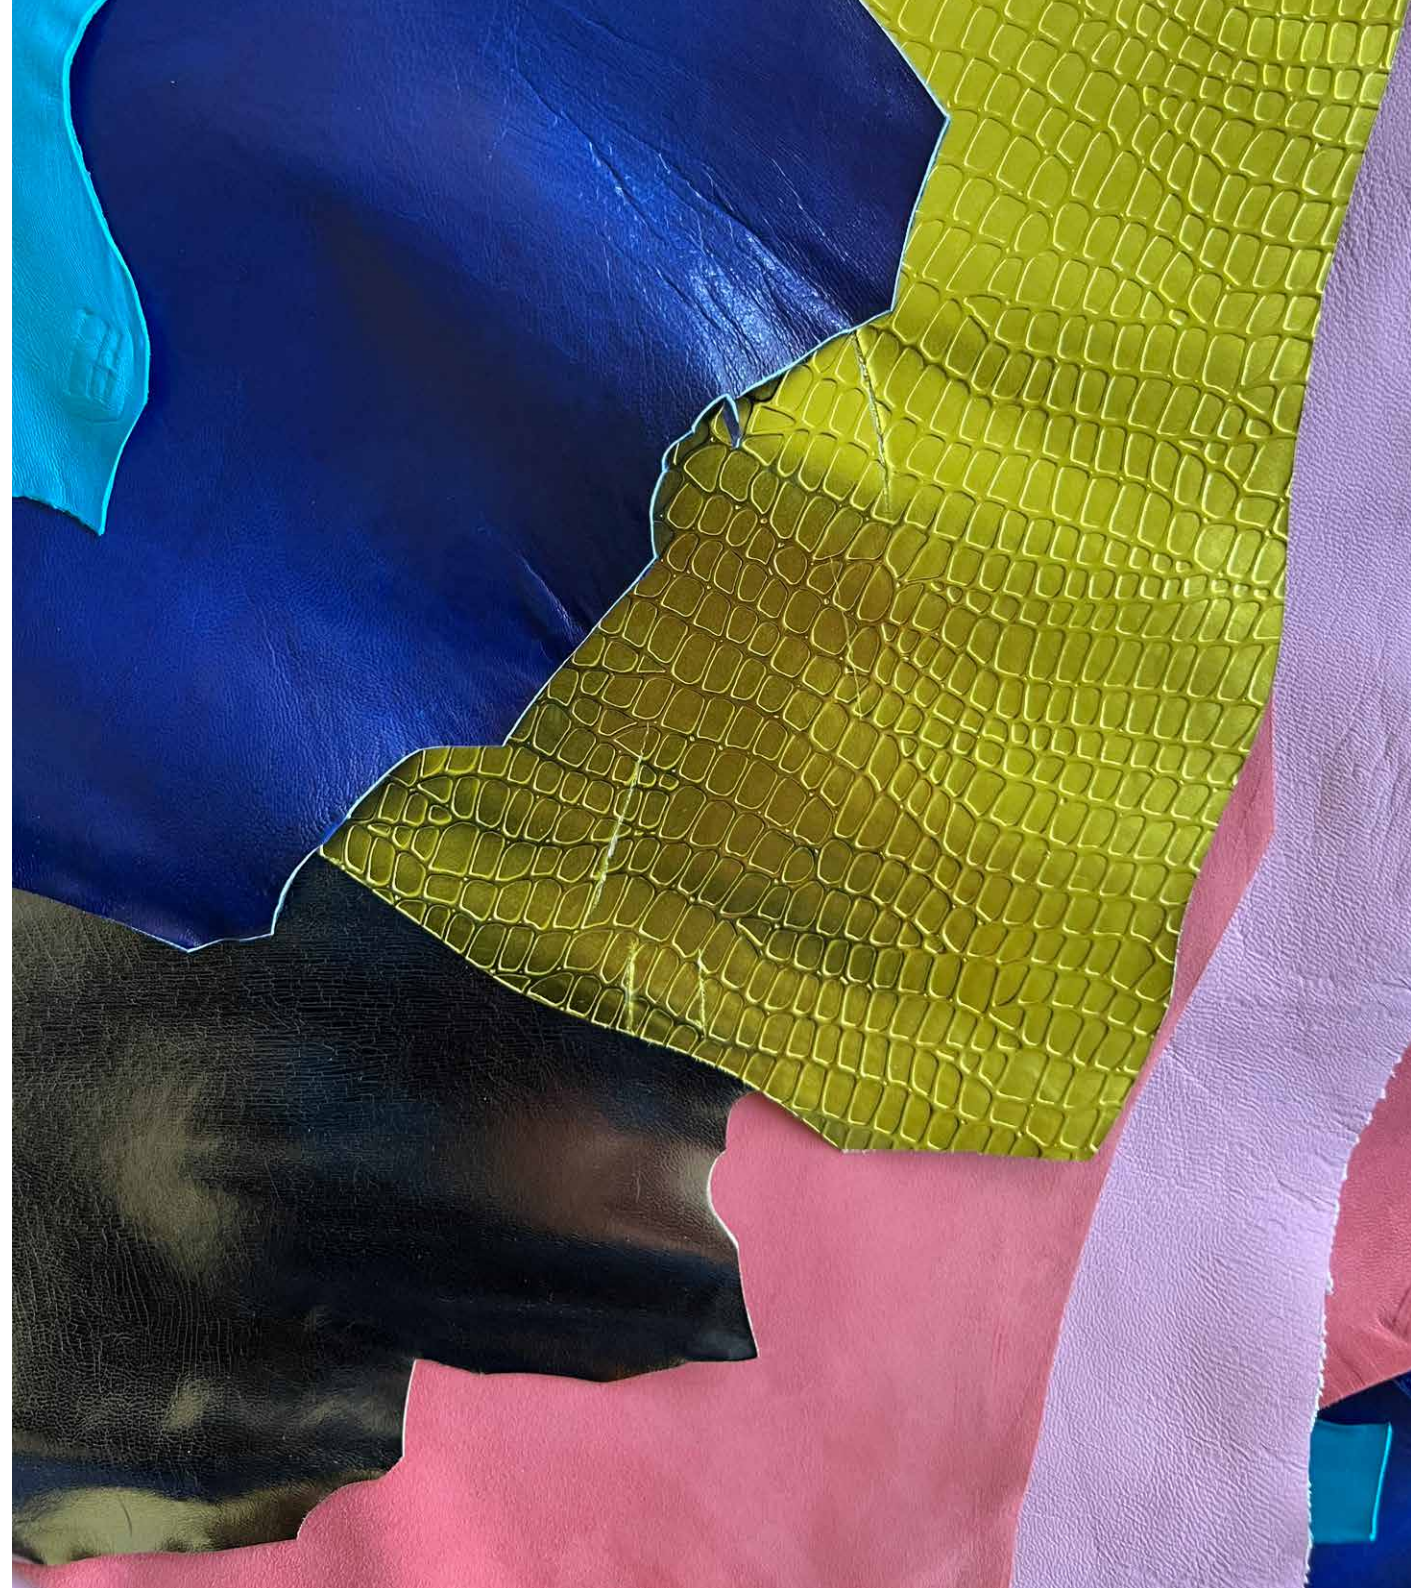

## upcycling & one-of-a-kind pieces

Every *klinik* patch comes from a committed upcycling approach. We source offcuts, end-of-series, and deadstock leather to bring them back to life.

Because we work with revalued materials, our collections are produced in very small runs.

When you order a color mood, we curate your custom kit in our workshop based on the leathers available at that moment.

Every kit is unique: your guarantee of a creation you won't find anywhere else.

## crafted by hand

The price of our kits reflects the time spent in the studio and the craftsmanship behind each creation.

Our pricing is based on three levels of savoir-faire:

### Die-cut

A graphic approach focused on shape and raw colour. This is our most accessible range.

### Embossed

A technique requiring two additional production steps to create lasting relief and texture in the leather.

### Hot foil

Our most precious finish, where metallic foil is fused onto the leather for a precise, refined finish.

Made in collaboration with a Paris-based workshop.

## technical & adaptable adhesive

Klinik is a playful product, yet crafted with rigorous technical standards.

### Engineered performance:

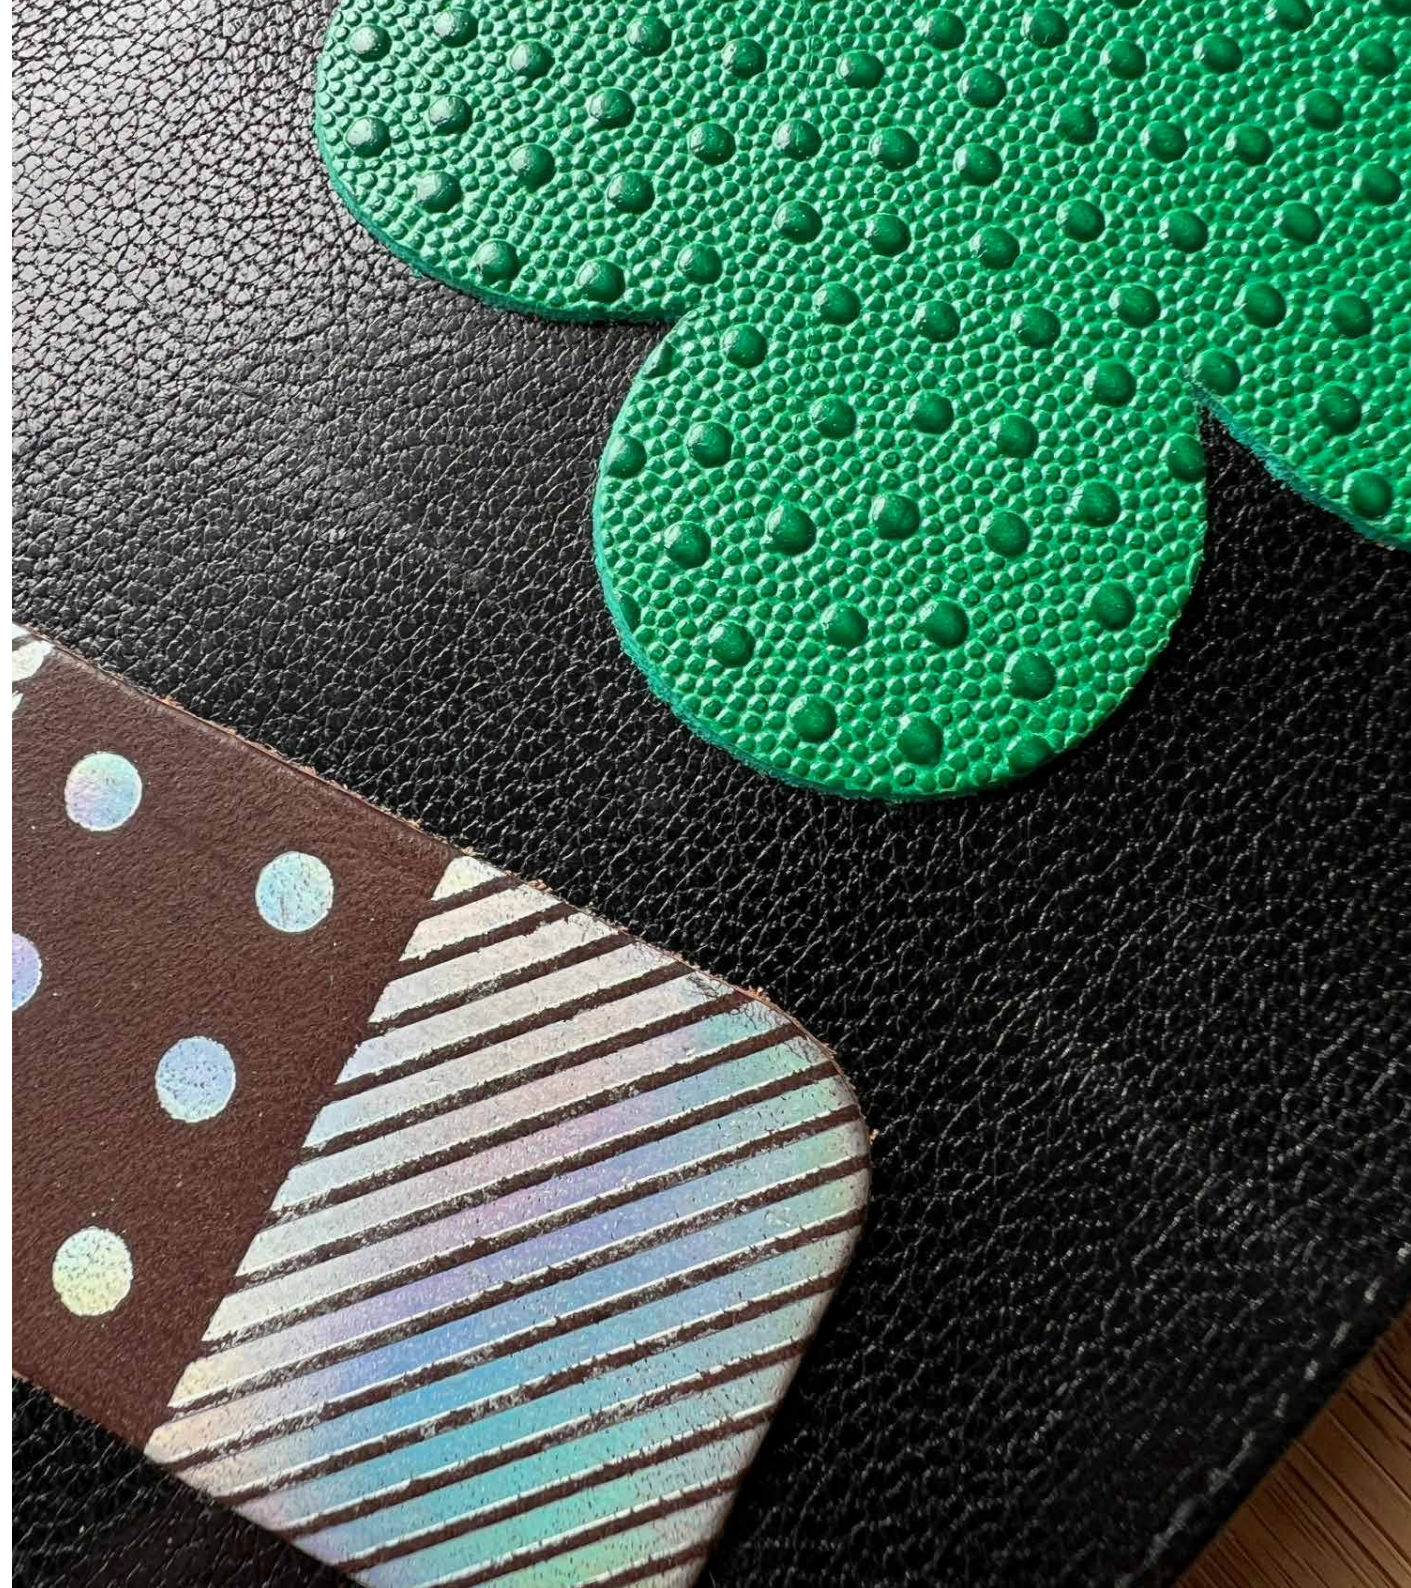

Developed in partnership with ITECH Lyon for a reliable hold on leather and rigid textiles, metal, plastic and wood.

**Adjustable application:** On very smooth surfaces (such as phone cases), the patch applies easily and can be gently readjusted for ideal placement.

**Usage note:** For high-stress areas (such as footwear), an adhesive attachment alone is not sufficient.

**Non-washable:** To preserve the natural structure of upcycled leather and the effectiveness of the adhesive, patches are meant exclusively for non-machine-washable items.

**Important Note:** Due to the natural origin of leather and its artisanal transformation, each piece may feature slight irregularities. These unique traits are an integral part of the product, guaranteeing its authenticity.

# How does it work?

Our leathers are sourced from deadstock, end-of-series, and production offcuts.

Since every kit is one-of-a-kind, you choose a graphic line and a color harmony, and we curate your assortment using available pieces.

1. Select your graphic line.  
Choose from our 3 themes:

*«scars with style»*  
The original Klinik DNA.  
Minimalist, high-impact kits  
1 or 2 pieces per kit.

*«patch-it- own-it»*  
2 patches per kit.  
Mixed textures, mixed techniques.

*«repair - rewear - relove»*  
Mix & match 3-patch set.  
Graphic embossing, cut leather, and varied textures.

2. Choose your color mood

Your kit will be curated in this colour harmony, according to the leather currently available in our studio. (Visuals and descriptions are for reference only)

3. Approve your selection

A unique part of our upcycling process: To review the textures together before shipping, you will receive a photo of the curated kits selected for you by email.

Your approval triggers the preparation of your package.

«patch it - own it»

Set of 2 leather patches

A mix of graphic embossing and die-cut leather in different textures and colours.

Each kit is composed around a colour mood.

- first aid
- vintage remedy
- the placebo
- core vitals
- energy shot

Select your models from the visuals provided in the order form.

WS - 7,00€  
RT - 15,90€

the colour moods

*first aid*  
Klinik's essential elements: a mix of natural-tone exotic leather, silver metallic leather, and a bold-colored patch.\*

*the placebo*  
A soft, fun remedy in fresh colors. A playful mix that instantly catches the eye! This kit combines pastel shades with bright, almost neon colors, enhanced by an embossed pattern from the «Kawaii» series.\*

*energy shot*  
An intense color remedy to recharge your energy. This kit pairs bright, almost neon shades with metallic leathers. Some pieces are highlighted by an embossed pattern from the «Kawaii» series.\*

core vitals

The radical intensity of monochrome. / This kit is the essential «constant» – both soft and functional. It features a tone-on-tone mix of different leathers, offering a variety of textures and finishes within the same color family (brown, black, beige, orange, fuchsia...).\*

*vintage remedy*  
A dose of Art Deco nostalgia and retro elegance. A combination of varied leather textures and a harmonious two-tone pairing, enhanced by a touch of metallic leather, white, or black.\*

\*Descriptions and visuals are indicative. The exact composition of each kit depends on the leather qualities and colours available at the time of order.

«repair-rewear-relove»

Set of 3 leather patches

A mix of graphic embossing and die-cut leather in different textures and colours.

Each kit is composed around a colour mood.

Discover our five moods:

- first aid
- vintage remedy
- the placebo
- core vitals
- energy shot

Select your models from the visuals provided in the order form.

## work with klinik

*klinik* is open to collaborations with brands, designers, retailers, cultural institutions, and creative partners.

### **Collaborate**

Develop exclusive selections, limited editions, or co-branded projects.

### **Customize & repair**

Give secondhand pieces or deadstock inventory a second life.

### **Workshops**

Explore repair, customization, and upcycling through hands-on experiences (team-building, brand activations, or events).

Interested in developing a KLINIK project? Let's talk!
